

Open Data For All

2016 Progress Report

The City of New York
Mayor Bill de Blasio

Anthony Shorris
First Deputy Mayor

NYC

Open Data for All

On July 15, 2015, the Mayor's Office of Data Analytics (MODA) and the Department of Information Technology and Telecommunication (DoITT) rolled out *Open Data for All*, a document that reflected a shift toward a more inclusive vision for Open Data. In the twelve months since, we have met with faces both familiar and new to the open data conversation. Their feedback helped set our priorities and redouble our focus on one number: 8.4 million, the total number of New Yorkers.

We've put together a list of recent milestones to both take stock of our progress and guide our engagements moving forward.

Open Data For All

COMMISSIONER ANNE ROEST
Department of Information Technology & Telecommunications

“At the Department of Information Technology and Telecommunications we work to deliver IT solutions for the people of the greatest city in the world. Few of our initiatives hold the transformative potential of open data - not only to make City government more transparent, but to empower New Yorkers to use open data - their data - to improve their lives.

We've seen this in action. From the 120 City data sets DoITT opened for the inaugural NYC BigApps competition in 2009 to the more than 1,300 available today, a thriving ecosystem has grown up around the City's efforts - students, journalists, businesses and others use City data daily for projects of their own. With our City Council partners we passed the City's Open Data Law, codifying these gains - and committing to build upon them - for future generations of New Yorkers. This law, and the spirit of collaboration that led to it, continues to inspire our efforts.

Open Data for All represents the next phase in this movement. True engagement, equitable engagement, isn't only about releasing data, it's about expanding opportunities for collaboration to all corners of the five boroughs, and providing the public - the tech savvy and the layperson alike - with the know-how to fully participate in a data informed City.

DR. AMEN RA MASHARIKI
Chief Analytics Officer
and Chief Open Platform Officer,
Mayor's Office of Data Analytics

“While I was a student at Brooklyn Tech, I majored in computer science. My love for the subject and my ability to succeed in the field were due to the unusual opportunities afforded to me - opportunities not typically extended to folks in my community. My mother introduced me and my siblings to technology early. She was a IBM manager at an IBM plant in Brooklyn and had access to the first ever IBM personal computer. Additionally, when I started high school, my mother invested in internet access. Having dial-up service at home was a big deal in the late 1980s. With access to a personal computer and the internet, I was able to engage my curiosity and grow my capabilities in computer science.

These investments opened up a new world to me. As the Chief Analytics Officer and Director of the Mayor's Office of Data Analytics, I want to help open up new worlds to all New Yorkers. With Open Data for All, we are introducing our vision for Open Data and how it can shape the City and the lives of New Yorkers.

The City of New York
Mayor Bill de Blasio
Anthony Scrima,
First Deputy Mayor

NYC

OPEN GOVERNMENT LEGISLATION

Over the last year, Mayor de Blasio signed a package of City Council bills that bolster Local Law 11 of 2012 – the Open Data Law – with requirements to make it easier for New Yorkers to access City data online. These laws, which include stronger requirements on data dictionaries and data retention, response timelines for public requests, and timely updates for certain datasets, help to anchor the city’s many transparency initiatives around Open Data.

PORTAL USAGE

New Yorkers interact with Open Data on a variety of channels – dashboards on agency websites, articles written by data journalists, apps that use our APIs – but at the core of the city’s Open Data ecosystem is the Open Data Portal. Since our last update, traffic on the Open Data Portal has more than doubled. In the past year, the Portal had:

- **Over 5 million hits.** The Department of Building's Job Applications Filings was the most viewed dataset.
- **More than 150 new datasets.** This brings the total to over 1,500 datasets, which collectively contain more than 750 million rows.
- **More than 100 automated datasets.** This brings the total number of automations to over 200.
- **More than 2,000 user-created views** based on City datasets.

Word size represents search frequency on the Open Data Portal in FY16.

NOTABLE DATA RELEASES

NYPD Seven Major Felonies

In 2015, the New York Police Department published incident-level data on the major felonies committed in the city that year. Due to significant public interest, NYPD has since expanded the data to include records dating back to 2006. The dataset features an interactive map that makes incidents searchable by category, location, timeframe, and other variables, and has been used by NYPD to ease the processes of initiating external research partnerships and sharing data across City agencies.

311 Call Center Inquiries

311 is often the first point of contact the public has with City services. Though the phone is just one of many ways New Yorkers interact with 311, call center agents answered over 7 million calls this year. Building on lessons learned from the automation of 311 service request data, 311 officials joined BetaNYC at Civic Hall this spring to announce the public release of all data on agent-answered calls dating back to 2011.

TLC Trip Records

Last August, the Taxi and Limousine Commission (TLC) published records on every ride taken in green and yellows taxis between January 2009 and June 2015. Previously, the Commission would respond to over 75 annual requests for information on green and yellow taxi trips by laboriously loading millions of data records onto physical hard drives. Putting this data on the Portal has cut down on the time and resources it takes to fill these one-off requests, while also spurring overall usage. In addition, TLC's datasets of active drivers and active vehicles – which include data on all For Hire Vehicles, including livery, limousine, and app-based services like Uber, in addition to taxis – are now among the most popular on the Portal.

Searchable Open Budget

In May 2016, New York City's \$82 billion budget was made available on the Open Data Portal. What previously existed only in print or as lengthy PDFs is now machine readable and searchable. Now taxpayers can easily see the breakdown of how their money is being spent.

City Record Online

Maintained by the Department of Citywide Administrative Services (DCAS), the City Record is the official newspaper for all NYC municipal business. Last August, DCAS unveiled the newly expanded City Record Online (CROL), which makes all notices in the newspaper fully searchable not only as an Open Data dataset, but also through a new online navigation tool that makes it easier than ever to access information about public hearings, personnel changes, and opportunities to contract with the City.

NYCHA Energy Data

The New York City Housing Authority (NYCHA) is voluntarily joining the Open Data movement and leveraging the Open Data Portal for its first public release. As part of its NextGeneration NYCHA Sustainability Agenda published in April 2016, NYCHA has committed to releasing energy consumption and cost data on all of its buildings later this month.

Shelter Repair Scorecard

As part of the effort to improve conditions in homeless shelters, Mayor de Blasio created the Shelter Repair Scorecard to report publicly on the conditions of homeless shelter facilities and track progress made by the expanded repair program to address sub-standard conditions. Data shows that increased inspections have been finding more violations than ever before, and that City and shelter providers have cleared more than 28,000 violations over the last two years. This data is shared both on the Mayor's Office of Operations website and on the Open Data Portal.

EVENTS

Citywide Engagement Tour

MODA met with New Yorkers throughout the city to spread the word to those unfamiliar with Open Data. Their thoughts and questions provided valuable feedback; this fall, MODA staff will begin holding in-person office hours continue the conversation.

NYC School of Data

On March 5, 2016, as part of International Open Data Day and Code for America's Code Across America, elected officials and civic tech groups convened at Civic Hall to celebrate and discuss the future of Open Data. MODA gave a presentation on the way Open Data powers analytics projects and supports information sharing across the city. In addition, Manhattan Borough President Gale Brewer announced the formation of a task force with a mandate to explore digital literacy and data science for high school students across the city.

NYC Parks TreesCount! 2015

In 2015, NYC Parks launched a participatory mapping campaign to better understand our urban forest, collecting a citywide inventory of street trees in New York City. Parks worked with more than 2,300 volunteers and more than 60 local neighborhood and community-based organizations to conduct the TreesCount! street tree census, enabling everyday New Yorkers to create Open Data for the city. On June 4, 2016, Parks teamed with MODA, the Mayor's Office of Technology and Innovation (MOTI), and BetaNYC to host the "TreesCount! Data Jam" where the community groups that collected data joined Parks to present five of their most pressing challenges to civic hackers. The event also included a workshop for Parks' volunteers and Open Data newcomers to develop skills to analyze TreesCount! data themselves – linking data stewardship with Parks' long history of tree stewardship.

PARTNERSHIPS

NYU CUSP Capstone

MODA is partnering with the academic community to examine where Open Data is reaching New Yorkers... and where it's not. A capstone at the NYU Center for Urban Science + Progress (CUSP) is measuring "data poverty" across the city. Data poverty refers to a condition in which communities or people lack access to, use of, or representation within data that is nevertheless used to inform decisions that may affect them. This analysis, the first of its kind for any city, will be released publicly later this summer.

Columbia SIPA Capstone

MODA also worked with the Columbia University School of International & Public Affairs (SIPA) to assess existing and future opportunities for Open Data to advance the goals of the city's many Community-Based Organizations (CBOs). Although municipal data is in high demand, CBOs pointed to several pain points in accessing and operationalizing Open Data. These results are informing conversations on ways to improve user experience on the Portal. Going forward, more datasets will include data dictionaries defining the attributes (and clarifying the usability) of their contents.

neighborhoods.nyc

Last fall, MOTI partnered with the local startup Vizalytics to unveil neighborhoods.nyc. With nearly 400 neighborhood-specific hubs, this platform centralizes some of the most in-demand information on Open Data – including alternate side parking information and 311 requests – in a web template available for licensing by local community groups.

Anne Roest
Commissioner

July 15, 2016

To the Mayor and the City Council:

Pursuant to the Open Data Law, section 23-506(c) of the Administrative Code of the City of New York, the Department of Information Technology and Telecommunications (DoITT) hereby submits the annual update to the NYC Open Data Plan.

The original NYC Open Data Plan included lists of public data sets submitted to DoITT by agencies covered by the Open Data Law. This report reflects updated information from those agencies. A summary description and anticipated date of publication for each public data set is included in the tables that are part of this update.

Additionally, pursuant to section 23-502 of the Administrative Code, as amended by (f), this plan includes statistics on Freedom of Information Law requests fulfilled as reported by agencies.

The NYC Open Data Plan and this update were created in compliance with the Open Data Law and with the Technical Standards Manual issued pursuant to the Open Data Law, and are available via the City's official website, *NYC.gov*.

Respectfully Submitted,

Anne M. Roest
Commissioner

cc: Mindy Tarlow, Director, Mayor's Office of Operations
Dr. Amen Ra Mashariki, Chief Analytics/Open Platform Officer

Introduction

To continue the transformation of the Open Data for All vision into a measurable, action-oriented plan, Dr. Amen Ra Mashariki, Chief Analytics Officer and Director of the Mayor's Office of Data Analytics (MODA), serves as the Chief Open Platform Officer (COPO), setting and overseeing the strategic vision for the City's open data initiatives and services. MODA and DoITT are partners in many ways and function as a complimentary team.

Since 2009 more than 1,500 data sets have been opened.

The progress made over the past year to increase the quantity and quality of the data is substantial, and we are inspired by the diverse and creative ways New Yorkers are using open data. To facilitate making more public data sets available in the past year, DoITT and MODA have convened regular citywide Open Data Coordinator (ODC) calls and meetings to provide agencies with guidance on adherence to Open Data legislation. Further, DoITT is working to be seen as a resource for agencies seeking guidance on how to prioritize and operationalize open data efforts and will soon expand its team of open data-focused staff. Efforts will continue leading up to and beyond the next Open Data Plan update.

Data that is truly open, easily accessible, and readily available is a key priority. The DoITT team consistently improves policies and practices to deliver the most current data possible. An example of these efforts is the continued automation of data sets, of which there are currently over 200 automated data sets. In addition to increased automations, DoITT and MODA will continue to work with agencies to expand the Freedom of Information Law (FOIL) information that is currently available on the Open Data Portal. This third annual update to the Open Data Plan includes the release schedule for over 200 data sets to be opened by December 31, 2018. This update also includes agency FOIL reporting metrics which highlight opportunities for agencies to analyze incoming FOIL requests, mindful of what already is—or what could be—available through the Open Data Portal.

In the year since the Open Data for All Plan of 2015 was released, there has been significant movement toward a more inclusive and prominent vision for Open Data—from identifying ways to dedicate more resources to the tech team who manage and facilitate the data sets, to increased oversight and engagement from executive leadership, including Commissioner Anne Roest and Director of the Mayor's Office of Operations Mindy Tarlow, who are charged with leading the City's overall open data efforts.

Together, and on behalf of the many City agencies represented in this update, we are proud of the progress we've made since July of 2015, and we look forward to incorporating the feedback we've received as we move forward.

Last year, the City Council passed seven pieces of legislation to reinforce and bolster the initial Open Data Law of 2012, fostering a more user-centric approach to open data.

Whether it's making data more understandable by including data dictionaries that help users more easily understand data, or streamlining feedback loops to facilitate a more collaborative approach with the public, open data as a concept *and* as a business practice is spreading throughout City operations.

The Open Data Plan reflects the City's vision for a more transparent and open government. So while it is intended to be a comprehensive account of the public data sets maintained by the City of New York, it is also a commitment to make those data sets available by a certain date. We will continue to partner with agencies to release data as outlined in this update. Further, we expect even more data to become available at a faster rate, illustrating that our commitment to open data exceeds legislative obligation.

Over the past year, 116 data sets from the Open Data Plan were released, including Beach Water Quality Results, Rodent Inspections, and the City Record Online (CROL). Additionally, more than 40 *unscheduled* data sets were published, demonstrating the commitment of agencies to make more data available as quickly as possible.

Going forward, we will continue to improve our leading-edge technology offerings, and deepen relationships with users, civic tech advocates, and agency partners.

Collaboration with DoITT, MODA, and the New York City Council to develop—and ultimately pass—open data amendments was a great first step, but we're not stopping there. We plan to continue evolving and maturing this vision for the future.

As we look back over the past year and look ahead to the coming year, we welcome continued public engagement and feedback on how to improve our efforts collectively as a City.

This plan is a living document and will be updated as additional data sets are identified and released.

To suggest data for inclusion on the NYC Open Data portal, please visit <https://data.cityofnewyork.us/nominate>.

NYC Open Data Plan 2016
